## Release Notes V4.0

---

Version 4.0 released 1/11/2014

### All Programs

1. All programs the TCP/IP components were updated to the latest versions.
2. Added the Windows 8 GUID to the application manifest.

### WxBBSrvr

1. Corrected a threading issue that caused the application to lock up. This was related to changes in the tcp/ip components.
2. Added code to clear out the buffer when the application received fragmented IP identification packets from the host master.

### WxRetran

1. No Changes.
