Weather Message
Release Notes V4.3

Version 4.3 released 3/27/2017

All Programs
1. All programs the TCP/IP components were updated to the latest versions.

WxMesgSetup
1. Added an Apply button. The button saves any changes and causes Weather Message Server to reload the settings. The setup program is not closed. The Save option will save the settings, cause the server to reload the settings and close the program.
2. Added the short message variable $Body$. This variable will pull the body text of the message.
3. Corrected a licensing issue that occurred when testing email settings.

WxMesgServer
1. Changed the way that headers are detected with the NoHead option. This should address some issues where long headers were not properly detected.
2. Changed the short message routine to be case insensitive. This addresses issues with the upper and lower case products.

WxMcli

WxMap

WxEmwin

1. The File Exit option now works.

WxPort

WxRadar

1. Now uses https to access the NWS radar site.
