Retransmission Software  
Release Notes V3.7

---

**Version 3.7 released 11-6-2010**

## **WxBBsrvr**

1. Enabled the EndAllNow host master command.
2. If the Use Fixed Address option is enabled, the program will no longer send IP identification request packets to the host master.
3. Entering a private fixed IP address will cause the server to automatically switch to a private server. Private addresses are considered to be 10.0.0.0 through 10.255.255.255, 172.16.0.0 through 172.31.255.255, and 192.168.0.0 through 192.168.255.255.
4. Implemented Host Master protocol 1.1.

## **WxRetran**

1. No Changes.
